OBJECTIVE

I am passionate about web development, eager to learn and implement new technologies to craft innovative and dynamic web experiences.

EDUCATION

Bachelor of Technology, Computer Science Engineering

JK Lakshmipat University, Jaipur, Rajasthan

2022 - 2026

Senior Secondary Education

Delhi Public School, Jaipur, Rajasthan

2021 - 2022

SKILLS

Technical Skills: Data Structures and Algorithms, Database Management Systems, OOP Concepts

Languages: C++, JavaScript

Development Skills: React, Tailwind CSS, Node.js, Express.js, PostgreSQL, MySQL, Git, Github

INTERNSHIPS

Front-End Developer Intern

May 2025 - June 2025

Dynamicore Strategies

Remote

- Developed a comprehensive fintech web app using TypeScript and Tailwind CSS.
- Built responsive dashboards, investment marketplace, loan management, virtual trading platform, and interactive gamified learning modules to enhance user engagement and financial literacy.

PROJECTS

Ryder - Built a full-stack platform for users to search, filter, and instantly book cars with real-time availability, streamlining reservations and inventory management.

Technologies Used : React, Tailwind, Node.js, Express.js, PostgreSQL, Razorpay

TurfOnTop - Developed an online turf booking system with real-time slot availability, secure payments, weather checks, and navigation, simplifying scheduling for users and venues.

Technologies Used : React, Tailwind, Node.js, Express.js, PostgreSQL, Google APIs, Razorpay

Trajectory - Built an AI career assistant using RAG, psychometric analysis, and job/education data to deliver personalized learning and opportunity paths for smart career decisions.

Technologies Used : React, Tailwind, Node.js, Express.js, Supabase, Python, FastAPI, LLMs, ChromaDB

StoryWrite - Created a real-time fiction writing app with version control, plot voting, and revenue-sharing, enabling efficient co-authoring and audience engagement.

Technologies Used : React, Tailwind, Node.js, Express.js, MongoDB
